

SUMMARY

Software Engineering student with hands-on experience developing full-stack web applications through academic and personal projects. Strong focus on C# and ASP.NET Core, with experience building RESTful APIs, authentication and authorization, CRUD operations, and database integration using SQL Server. Also familiar with React and JavaScript for developing responsive web interfaces. Comfortable working with Git/GitHub and development tools such as Visual Studio and Postman. Passionate about .NET development and continuously improving software engineering skills through practical projects.

EDUCATION

Oct, 2023 - Present

Ho Chi Minh City University of Foreign Languages and Information Technology

Major: Software Engineering

Expected Graduation: 2027

SKILLS

- Languages: C#, JavaScript, SQL
- Frontend: React, Vite, HTML5, CSS3
- Backend: ASP.NET Core, Node.js, Entity Framework Core, JWT
- Database: SQL Server, MongoDB
- Tools: Git, GitHub, Docker, Visual Studio, Postman
- English: Reading technical documentation and basic communication

PROJECTS

E-Commerce Website

Aug 2025 – Present

Team: 3 developers

MY POSITION IN PROJECT FULL-STACK DEVELOPER

Technology in use:

- Frontend: React, Vite, JavaScript
- Backend: C#, ASP.NET Core Web API, Entity Framework Core, JWT
- Database: SQL Server
- Integration: VNPay, Gemini AI, SMTP
- Tools: Git, GitHub, Swagger/OpenAPI, Vercel

Key Contributions:

- Developed a full-stack fashion e-commerce platform with customer and admin systems.
- Implemented authentication, role-based authorization, product search/filtering, wishlist, cart, checkout and order management.
- Integrated VNPay for online payment and SignalR for real-time customer support chat.
- Integrated Gemini AI chatbot and Apriori-based product recommendation features.
- Developed admin modules for products, categories, inventory, orders, users, roles, vouchers and analytics.
- Designed a layered ASP.NET Core architecture using Domain, Application, Infrastructure and Web API layers

NikeFake — E-Commerce

Dec 2025 – Present

Personal Project

MY POSITION IN PROJECT FRONT-END DEVELOPER

Technology in use:

- Frontend: React, Vite, CSS
- API & Data: Axios, RESTful API
- Routing: React Router
- Tools: Git, GitHub, Vercel

Key Contributions:

- Developed a modern and responsive Nike-inspired e-commerce website using React and JavaScript.
- Built product listing, product details, search, category filtering and product browsing functionality.
- Implemented shopping cart functionality including product quantity management and order total calculation.
- Developed wishlist functionality allowing users to save and manage favorite products.
- Integrated RESTful APIs using Axios to retrieve and display product data.
- Implemented client-side navigation and page routing using React Router.
- Designed reusable React components and responsive user interfaces for Desktop, Tablet and Mobile devices.
